UNIT4 BUSINESS WORLD RELEASE 7.2

UNIT4

BUSINESS WORLD RELEASE 7.2

Keeping your solution up to date is regarded as best-practise. The new constant improvements to the solution offer better security and assist in maintaining compliance against cyber threats whether your solution is on-premise or in the cloud.

Organisations that upgrade their solution regularly have reported numerous benefits and cost savings. Such as:

- Reduce operation costs by an extra %6
- Reduce Admin costs by an extra %4
- Improve business process speed by an extra %3

What's new in the latest version

New or enhanced capabilities

Our latest release combines a host of planned developments and other underpinning technical improvements, with enhancements prompted by statutory requirements, customer requests and market innovation.

- **Reference Projects** – Identify historical project experience as input for planning new projects.
- **Information Browser** – One single starting point for all your operational reporting requests. Enables easier and more flexible access to information for more users, helping you get more value out of your data to drive operational efficiency and create an intelligent user experience.
- **Revenue Recognition** – Enhance the user experience and improve the overall process of project forecasting – all in full compliance with new IFRS15 and ASEC 606 regulations.
- **PSA Suite Integration** – Enabling our Business World customers to take advantage of the PSA Suite with further integration between the two solutions, adding purchase to pay, absence request and overtime reimbursement capabilities.
- **Anonymization of personal data (GDPR)** – Following the new GDPR requirements, we have further refined the security and privacy capabilities of Business World, making it easier for customers to anonymize and/or delete personal information and documents. Watch our on-demand webinar: "Is your organization GDPR compliant? Unit4 & the GDPR" to find out more.
- **Wanda, the Digital Assistant** – Wanda introduces a more intuitive user experience, using natural language and becoming more helpful with each new user interaction. Our digital assistant increases productivity and focus pointing users to their priority tasks and working in the context of apps that people use in their daily life.
- **Workspaces** – Complete overview to information relevant to specific roles or user types. Workspaces will also give access to functional capabilities – all in context and within one, single user experience.
- **Absence Workspace** – Balance between support for your people and ensuring full attendance. Our new absence workspace helps you better monitor and measure the absences of your employees.
- **Requisitions** – Requisitions can now be raised on behalf of other users. Further enhancements include extended value lookup capabilities, enabling users to use advanced search and customize results by adding filtering.
- **Invoice Approval** – a significantly enhanced user experience when viewing PDF invoices.
- **Timesheet Mobile App** – users will now be able to enter/change cost center when entering time.
- **Accessibility Improvements** – enhancements to selected web screens to comply with WCAG requirements.
- **Field Service Mobile App** – improved user experience around sorting and grouping of information
- **Asset Inspection** – inspections can now be signed off by customers using an electronic signature. Users can also see uploaded documents via the app.

Extend your Business World solution

The technical advances built into our latest release offer great new opportunities for Unit4 customers to benefit from our complementing solutions and innovative new tools.

- **Payment and Deduction calculations** - More than 50 new macros which can pull data from anywhere connected to the employee and use this, making calculations much easier and more efficient.
- **Localizations**
- **Digital Medical Notes (Digital Sykemelding), Norway** – allows employers to do a direct import of Medical Certificates and Doctors notes into their HR system for usage in absence-and reimbursements processes.
- **Standard Audit File for Tax (SAF-T), Norway** – Ensure compliance with employer duties under the Bookkeeping Act to meet the new SAF-T reporting obligations, which will be mandated by 1st of January 2020.
- **New Tax Card format, Norway**
